- Work-based education

WORK EXPERIENCE

Healthcare

Registered Nurse and Assistant Nurse
Remeo, Södersjukhuset, Linköping University Hospital, etc.
2016 – present

Work in areas such as intensive care rehabilitation, infection, and oncology. Working as a nurse has given me experience in high-intensity environments and has developed my skills in problem-solving, prioritization, and critical thinking. Working in multidisciplinary teams has strengthened my communication and collaboration skills.

Customer Service & Support

Customer Service Representative
SEB, Tre
2012 - 2015

Work in technical support and customer service, which has given me experience in analyzing problems, providing solutions, and communicating technical information to various target groups.

INTERESTS

I spend my free time learning Java, spending time in nature with my dog, reading, and being with my partner and friends. When I want to be creative, I engage in crocheting, painting, or pottery. I also enjoy traveling, whether it's to the mountains for snowboarding or to warmer destinations to relax on a beach or explore new cities.
